I'm a final-year Information and Communication Technology student at Prince of Songkla University, Hatyai. I'm passionate about full-stack web development, mobile apps, and AI. I've worked with technologies like React, Flask, PHP, Git, Docker, MySQL, and MongoDB. I've contributed to real-world projects such as the VMW Dormitory Management System. I'm driven to grow my technical skills, collaborate in teams, and build meaningful, user-focused solutions.

🖥 EXPERIENCE & PROJECT

2025 — **VMW Dormitory Management System**

Developed a dormitory management system with attendance tracking, QR code scanning, and real-time leave requests, utilizing digital data storage for enhanced security.

2024 — **ITM Network Games 21st Edition – Event Director**

Led the annual event between four southern universities, managing coordination, team, and budget. Organized sports, academic, and e-sports competitions with over 300 participants, fostering collaboration and skill development in IT students.

2022 — **Teaching Assistant – Godot Game Development Camp**

Assisted and supported participants with academic guidance on using Godot to create 2D/3D games, providing troubleshooting and answering questions during the learning process.

2024 — **Task Management and Calendar Integration**

Developed a task management app using React.js and Material-UI, integrated with Asana API for calendar views and real-time task creation and editing.

2023 — **GameHub Platform**

A web application for managing game data, built with React, Express.js, and MySQL, featuring game details, recommendations, and user management.

🖥 SKILL

Front-End :
- HTML
- CSS
- Javascript
- React
- Next.js
- C#.NET
- Mudblazor

Back-End :
- NodeJS
- NestJS
- ASP.NET

Data base :
- MySQL
- PostgreSQL
- Mongodb

Tool :
- Figma
- Github
- docker
- Postman

Programming :
- python(basic)
- C
- JAVA
- C#
